

SERVICE INFORMATION LETTER

TO: OWNERS AND OPERATORS PACIFIC SCIENTIFIC
COMPANY AIRCRAFT RESTRAINT PRODUCTS.

SUBJECT: INFORMATION REGARDING FLAME RESISTANCE
TESTING.

PURPOSE: THIS SERVICE INFORMATION LETTER (SIL)
CLARIFIES PACIFIC SCIENTIFIC'S RESTRAINT
SYSTEMS FLAME RESISTANCE CERTIFICATION.

1. INTRODUCTION
Pacific Scientific has become aware of a few operators who require copies of flame resistance testing certifications with the acceptance of restraint products. The FAA/JAA 8130-3 from the authorized TSO holder of the part number being manufactured or repaired certifies complete compliance with type design criteria which includes all necessary flame resistance testing and certification for the unit received.
2. SCOPE
This SIL involves all Pacific Scientific restraints products.
3. REFERENCE
Pacific Scientific CMM 25-11-49
TSO-C114
TSO-C22G
SAE AS8043
4. COMPLIANCE
N/A – Information Only
5. TOOLS
None Required.

SERVICE INFORMATION LETTER

6. Information

Pacific Scientific is an approved OEM manufacturer of restraint products for all commercial and general aviation airframe manufactures. Pacific Scientific holds several TSO authorizations for restraint manufacture. All webbing material used in genuine Pacific Scientific restraint products has been Flame Resistance Tested and certified compliant as required by SAE AS8043 and all TSO authorizations. The receipt of an FAA/JAA 8130 issued by Pacific Scientific insures proper materials were used in the manufacture or repair of Pacific Scientific restraint products.

Pacific Scientific does not authorize the repair or replacement of webbing on its restraint products. Pacific Scientific products that have been re-webbed by third parties no longer meet the requirements of the TSO issued to Pacific Scientific for those part numbers and should be removed from service.

Please See Pacific Scientific CMM 25-11-49

7. COST AND AVAILABILITY
